A scatter plot showing the relationship between subjectivity score (x-axis, ranging from approximately 0.2 to 0.8) and preferred distance from noun (y-axis, ranging from 0.3 to 0.8). Data points are labeled with adjectives: rotten, smooth, bad, good, fresh, huge, long, hard, solid, big, new, short, small, purple, round, green, blue, plastic, square, brown, wooden, yellow, metal. A black regression line with a gray confidence band is shown.
